We learned...

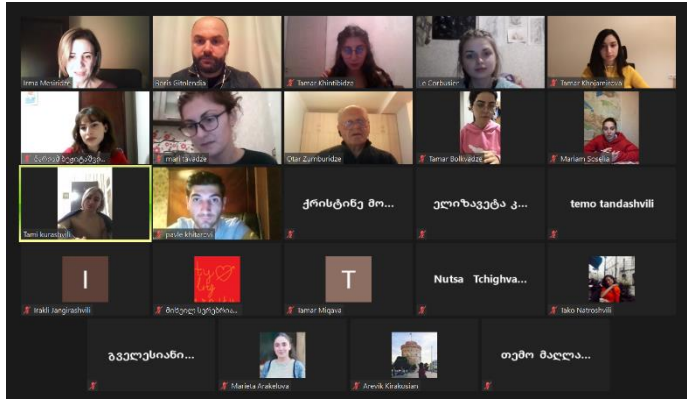

... What agility really means – how important it is to be comfortable with change

... The value of communication technology – accelerated the adoption of technology

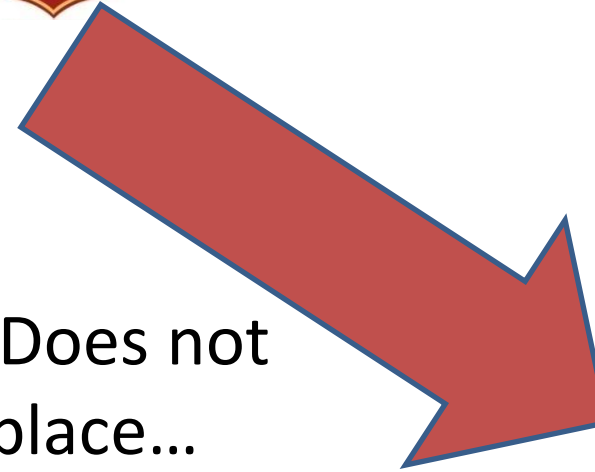

... What productivity actually is – more productive but lonely

... The essential nature of social interaction – how much of our work is based on creativity that comes from social interaction

... Health and well-being – work life balance is not about less work...

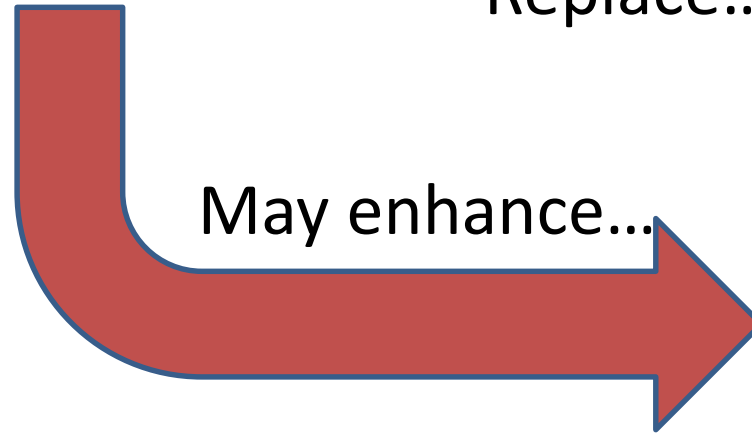

This....

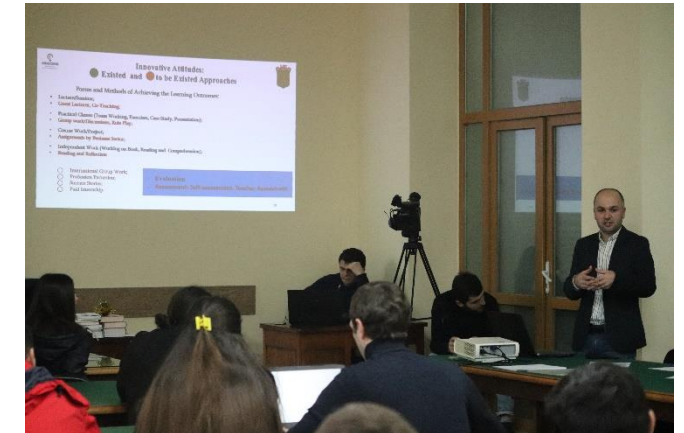

.... Does not Replace...

But, this...

May enhance...

That...
