I will use some of the methods with the correspondent students.

I am going to apply the approaches presented during the training according to the needs and demands of the group.

The experience acquired during the course will invaluablely contribute to my teaching practice. It can be incorporated into my usual ways and methods of teaching for even better achievements and results.

I will try to use more online resources, group work and innovative, interactive methods as well as more collaboration and cooperation, interdisciplinary teaching.

I will try to apply a combination of the approaches and tailor to the classes I teach

As a result of this training I will use all active learning approaches during my classes

Well, I think I can combine some of the methods introduced by the trainer with those I have been applying during the years of my teaching experience.

I am going to use the new methods and approaches rather extensively to raise intrinsic interest in students and make classes more feasible

Actually, I have been implementing some of the ideas, maybe, subconsciously. I think, I shall do my best to write a course book which will orient on this teaching methods...

5.3. Please write any other comments you may have about this training.

I found the training refreshing and motivating. Lilit is a very engaging trainer and covered a range of topics which appealed to everyone. The training was well organized, interactive, positive and relevant to to the real education process.

Good luck to our fantastic trainer and my fellow teachers in the implementation of the active learning in our classrooms!

The training was very well-organized, managed, very innovative and useful.

I would like to thank the trainer for the content and delivery as well as good preparation for the workshop I would recommend my colleagues to take the opportunity of attending similar presentations delivered by Lilit Sargsyan.

The training was very interesting innovative it gave us a lot of new ideas to be implemented in our classes

The TT course was really very useful, informative and interesting. The trainer was using modern technologies and techniques, which made the classes more active and involving. Moreover, due to accurate timing on the part of the trainer, we were able to have group discussions.

It was actually well-designed and well-presented

I would like it to orient/focus more on the methods of teaching specific disciplines, like Business English, or Political Science:

Thank you for your time and valuable feedback!
