If Training will be more often I will be able to apply acquired skills in my online teaching practice. thank you for special training.

Useful information and examples. Thanks a lot.

Thanks a lot for the interesting and very useful training.

very interesting and applicable for my future teaching practice. Thank you!

The content of the masterclass was very useful and needed. Some of the demonstrated tools were new and the presentation provided was convincing and informative. However, considering the novelty of the tools, the time allocated for the masterclass was not enough to acquire at least some skill of using them. The time shortage also affected the participants - they only listened and did not ask questions. Anyway, the information and links the trainer shared, I will explore further, practise, and definitely integrate in my teaching practice. Thank you!

Thank you for very interesting master class!

**Thank you for your time and valuable feedback!**
